## ***Introductory notes***

This Information presents the state of public indebtedness of Bosnia and Herzegovina as of 31/12/2020 in accordance with the data at the disposal of the Ministry of Finance and Treasury of Bosnia and Herzegovina. The terms used in the Information on Public Debt of Bosnia and Herzegovina, in accordance with definitions determined in the Law on Borrowing, Debt and Guarantees of Bosnia and Herzegovina, Article 3 - Definitions (*Official Gazette of Bosnia and Herzegovina*, 52/05, 103/09 and 90/16) (hereinafter referred to as: "BiH Law on Borrowing"), shall have the following meanings:

**State debt:** debt denominated in domestic currency, the borrower of which is MFT BiH on behalf of BiH.

External state debt: state debt created in accordance with an international agreement. Debt created between 2 April 1992 and 14 December 1995 shall not be deemed as the external state debt.

**External debt state guarantee:** guarantee issued by the state guaranteeing that a loan under an international agreement will be repaid partially or in its entirety in case of the default by the borrower.

**Debt of Entities and BD BiH:** debt denominated in domestic currency, the borrower of which, directly or indirectly, is the Ministry of Finance of the Entity/BD BiH Financial Directorate on behalf of BD BiH.

**External debt of Entities and the District:** debt of Entities or the District under an international agreement concluded in accordance with the procedures defined by the Law on Borrowing, Debt and Guarantees of Bosnia and Herzegovina.

**Domestic state debt:** State debt, excluding the external state debt.

**Direct domestic state debt:** Domestic debt created directly on behalf of Bosnia and Herzegovina

**Indirect domestic state debt:** Domestic state debt created at the request and on behalf of a debtor, repaid by the State exclusively from the funds paid by the debtor for their relevant domestic debt.

**Domestic debt of Entities and BD BiH:** debt of Entities or BD BiH, excluding external debt of Entities or BD BiH.

**Debt servicing:** annual payment of funds for principal, interest, discount and other obligations under a debt, including other related costs.

**Entities and District guarantees:** guarantees for loans payable in domestic and foreign currencies for which the guarantor is the Ministry of Finance, on behalf of an Entity, and the Finance Directorate of Brčko District, on behalf of the District.

***Other terms used<sup>1</sup>:***

**BiH public debt (public indebtedness):** aggregate of external and domestic debt.

**BiH external debt (external indebtedness):** Debt including external state debt, external debt of Entities and the District and external debt of local self-government units.

**Local self-government units debt:** Debt of the local self-government units under an international agreement concluded directly between the local self-government unit and the creditor, directly serviced by the local self-government unit.

**BiH domestic debt (domestic indebtedness):** Aggregate of direct and indirect domestic state debt, domestic debt of Entities, domestic debt of the District, domestic debt of Cantons, cities, municipalities, social security funds and public enterprises.

**Old debt:** state debt created prior to 2 April 1992, i.e. the debt assumed by Bosnia and Herzegovina as succeeded international obligations created prior to 2 April 1992, reconstructed and reprogrammed following negotiations with foreign creditors.

**“New” debt:** external debt created after 14 December 1995.

**Contracted credits:** total amounts of contracted credits in accordance with international agreements.

**Active credits:** total amounts of active credit funds until the observed period, including the “old” debt.

**Inactive credits:** total amounts of contracted credit funds concluded in accordance with international agreements, minus total active amounts.

**State of indebtedness:** total active credit amounts minus repaid principals.

**Commitment fee:** (cost/fee for approved inactive funds): Fee paid for an inactive credit facility, i.e. inactive part of credit funds. Commitment fee is defined by general operative procedures of certain creditors (KfW, IMF, EBRD, etc.) and is usually defined as a fixed percentage calculated for the inactive amount of the credit. The borrower pays the commitment fee as a compensation for maintaining the funds under the open credit facility, i.e. for ensuring disbursement of credit funds on specified future dates.

Analytical overview of BiH external debt is presented in Annex 1, while the overview of inactive credit funds under concluded credit agreements and paid commitment fees is presented in Annex 2.

<sup>2</sup> Preliminary data

<sup>3</sup> Procedures and the method of conclusion of international agreements under state external debt are regulated by the Law on Borrowing, Debt and Guarantees of BiH, Chapter III, Article 39 (*Official Gazette of Bosnia and Herzegovina*, 52/05, 103/09 and 90/16) and the Law on the Procedure of Conclusion and Performance of International Agreements (*Official Gazette of BiH*, 29/00 and 32/13).

<sup>4</sup> External debt of Entities and the District is regulated by Article 49 Of the Law on Borrowing, Debt and Guarantees of BiH and the laws on borrowing, debt and guarantees of Entities. Obligations created under this debt are serviced directly by Entities and the District. Although Entities did not complete all borrowing procedures for external public debt defined by Article 49 of the Law, the Ministry of Finance and Treasury of BiH presents these information on the basis of reports submitted by Entities, with the aim of overall reporting on BiH external debt.

<sup>5</sup> For BiH institutions-EBRD credit-air traffic, export credit “1” of the Government of Belgium, European Commission credit-Macro-financial assistance II, CEB-State prison, Saudi Fund for Development (SFD)-Reconstruction of Housing Units for Displaced Persons in BiH.

<sup>6</sup> The stated amount comprises contracted amounts of the external state debt, as well as the external debt of Entities and the District and external debt of local self-government units. Repaid credits are not included.

## 1.2 External debt structure by the period of creation and creditors

As of 31/12/2020, the “old” debt participates with 9.25 per cent in the external debt, and it is lower than participation in 2019 which amounted to 11.67 per cent. The “old” debt comprises the succeeded debt toward the Paris Club of creditors, the London Club of creditors and WBIBRD loans. Within the framework of the “new” debt, the majority of debt in terms of percentages is the debt toward international financial institutions (EIB, WBIDA, WBIBERD, EBRD, MMF).

EUR, SDR<sup>12</sup> and USD are predominant currencies in the currency structure of the contracted foreign debt, as well as in the foreign debt state, amounting to 91.35 and 92.64 per cent.

When it comes to the currency structure of repaid BiH external debt in the observed period, majority of obligations or 74.76 per cent was paid in EUR, 18.28 per cent in USD, while 6.96 per cent is implemented in other currencies (toward some countries from the Paris Club of creditors or under credits from bilateral agreements). Of total paid obligations in EUR, 2.08 per cent pertains to obligations repaid to IMF, since the calculated obligations in SDR are repaid in EUR.

<sup>12</sup> SDR (*Special Drawing Rights*)-calculation unit used by IMF, World Bank and several other international institutions. It comprises “a basket of currencies”, i.e. USD (41.73 per cent), EUR (30.93 per cent), CNY (10.92 per cent), JPY (8.33 per cent) and GBP (8.09 per cent).

### 1.7 Indicators of external debt susceptibility to other risks

In addition to the level of indebtedness, the debt structure represents one of the reasons behind financial crisis and instability. Therefore, the external debt portfolio should be analysed through its exposure to risks. It can be said that one of the purposes of BiH external debt structure analysis is to identify the exposure of the current external debt portfolio to currency risk, interest rate risk and refinancing risk. Parameters of BiH external debt exposure to the stated risks are represented in the following table.

Table 6 BiH external debt risk indicators in 2019 and 2020

Risk indicators		2019	2020
Interest rate risk	Fixed interest rate (%)	68.12	62.36
	Variable interest rate (%)	31.88	37.64
	Debt re-fixed within one year (% of total)	36.23	41.93
Refinancing risk	Average re-fixing period (years)	5.14	4.51
	Average maturity (years)	7.22	6.77
	Debt maturing within one year (% of total)	7.50	7.71
Currency risk	Average grace period (years)	6.61	6.22
	Non-EUR currencies share in external debt (%)	39.79	41.37

<sup>13</sup> Overview of currency structure also includes data on external debt of Entities and District and external debt of local self-government units, competent for repayment of the debt. Other currencies are: JPY, KRW, CHF, KWD, SAR, CAD, SEK, DKK, GBP.

Re-financing risk represents debt maturity structure and percentage of debt maturing in the short-term, interest rate risk, debt exposure through changes in interest rates, while the currency risk represents the degree of exposure of the total debt structure to changes in exchange rates of currencies included in the debt portfolio.

Re-fixing the external debt takes 4.51 years, on average. External debt re-fixed within one year represents 41.93 per cent of the total external debt portfolio, as the result of the fact that 37.64 per cent of the external debt portfolio is contracted with a variable interest rate. The exposure to the interest rate risk in 2020 is higher than in 2019. As the result, borrowing under a fixed interest rate is more desirable, in parallel to keeping in mind the ration between costs and risks, since the cost of variable interest rate is currently significantly lower than the cost of the fixed interest rate.

The average maturity period of foreign credits in 2020 is 6.77 years, while the indicator pertaining to the participation of the foreign debt maturing in the following year is 7.71 per cent, while the average grace period of foreign credits as of 31 December 2020 amounts to 6.22 years. By comparing the refinancing risk indicators in 2020 to the refinancing risk indicators in 2019, it is evident that there is an insignificantly higher exposure to the **refinancing risk** in 2020. Decreasing and mitigating the stated risks requires extension of the maturity of foreign debt.

Bearing in mind the currency board arrangement implemented by the CB BiH, i.e. the connection between BAM and EUR, 41.37 per cent of public debt is susceptible to foreign exchange rates, i.e. exposed to the **currency risk**. In 2020, the participation of non-EUR currencies in the external debt is higher than in 2019. Therefore, the exposure to the currency risk has increased.

The stated indicators were predominantly influenced by borrowing under the IMF RFI arrangement (Rapid Financing Instrument) with the purpose of mitigating the adverse consequences of the Covid-19 pandemic to the economic activity. The currency of IMF credit is SDR, which is factored in relation to BAM and EUR, the interest rate is variable and amounted to 1.08 per cent as of 31 December 2020, while the principal is being repaid quarterly, within 2 years upon expiration of the 3-year grace period.

## **1.8 Overview of projects in the procedure of conclusion**

**Projects in the procedure of conclusion**<sup>14</sup> encompass projects in the procedure of initiative for negotiations, negotiating with other creditors, in the procedure of approval by creditors and projects concluded and in the procedure of ratification. Foreing credits in the procedure of conclusion as of 31 December 2020 relate to financing of projects in the field of health, road, water and communal infrastructure, agricultral development projects and rural enterprises, macrofinancial assistance and projects for registration of real estates, energy efficiency, support to companies and business entities and flood protection projects (Annex 5).

As of 31/12/2020, the total value of projects planned for financing from credit funds from external sources amounts to 2,975.08 million BAM, of which 64.52 per cent pertains to FBiH, 34.89 per cent to Republika Srpska and 0.59 per cent to the District. The stated projects are planned to be financed mainly from multilateral sources (96.65 per cent) pertaining mainly to EIB, EBRD, the European Commission and the World Bank, while 3.35 per cent are planned to be financed from bilateral sources.

Of the total value of projects planned for foreign credit financing, 75.12 per cent pertains to infrastructure projects, 20.43 per cent for public sector projects and 4.46 per cent to economic activity projects. In the currency structure of external credits planned to be used for financing projects in the procedure of conclusion, EUR makes for 97.32 per cent.

### ***2.1.2.7 Tax refunds to Municipalities and Funds under settlement of tax obligations through bonds of Republika Srpska***

The Government of Republika Srpska adopted a Directive on settlement of tax obligations through bonds of Republika Srpska, regulating conditions and procedure for settlement of matured tax obligations created prior to 31 December 2017, and relating to tax obligations the collection of which is in the competency of Republika Srpska.<sup>29</sup> As of 31/12/2020, this debt amounts to 1.16 million BAM.

### ***2.1.2.8 Obligations under activated guarantees***

On the basis of the issued guarantee, Republika Srpska assumed the obligation of repayment of credit for Nikola Tesla d.o.o. in the amount of 5.00 million BAM, with the repayment period of 10 years, grace period of 1 year and interest rate of 4.60 per cent. Debt under this item amounts to 2.05 million BAM.

## ***2.1.3. Domestic debt of Municipalities, Cities and Cantons***

Domestic debt of Municipalities, Cities and Cantons relates to the debt created under borrowing from commercial domestic banks and emission of bonds.

In accordance with the data at the disposal of the Ministry of Finance and Treasury<sup>30</sup>, as of 31/12/2020, this debt amounts to 665.89 million BAM, of which the debt under issued bonds amounts to 78.40 million BAM and the debt under credit borrowing to 587.49 million BAM, as presented in Annex 10.

## ***2.1.4. Debt of Social Security Funds***

The National Assembly of Republika Srpska adopted the Decision on indirect borrowing of Republika Srpska for the Social Security Funds and Public Health Care Institutions<sup>31</sup> for: The Health Care Security Fund, the Public Fund for Child Protection of RS and the University Clinical Centre Banja Luka.

---

<sup>29</sup>Tax obligations are settled in bonds under their nominal value over the grace period, prior to principal maturity, while after the grace period expires, the tax obligations may be settled in bonds only in the amounts that correspond to the amount of unpaid principal debt under bonds. The Regulation relates to the bonds of RS issued for settlement of obligations under domestic debt, i.e. general obligations and obligations under material and non-material damages that occurred during the war period.

<sup>30</sup>Provisions of the Law on Borrowing, Debt and Guarantees of BiH and provisions of by-laws regulate that, on the basis of information and documents to be submitted by the Entities and the District, the Ministry of Finance and Treasury of BiH is responsible for maintaining records related to the total debt and guarantees of Entities, including debt and guarantees of Cantons and Municipalities and debt and guarantees of the District.

<sup>31</sup>Decision of the National Assembly of Republika Srpska (*Official Gazette of RS*, No. 99/11).

As of 31/12/2020, the debt of the Funds under this basis amounts to 212.58 million BAM as follows: direct debt 210.12 million BAM and indirect debt 2.46 million BAM.

### ***2.1.5. Debt of public companies***

The domestic debt of public companies in the majority ownership of FBiH amount to 26.15 million BAM as of 31 December 2020 and relates to the debt of PC Autoceste FBiH.

### ***2.2 Domestic debt over the period***

As of 31/12/2020, the amount of domestic debt is by 13.80 per cent bigger than in 2019, while in 2019 it was by 5.74 per cent bigger than in 2018. In accordance with the projections of Entity Ministries of Finance and the Finance Directorate of Brčko District<sup>32</sup>, the domestic debt should decrease in the following three years, as shown in the following table.

### 3 GUARANTEES FOR EXTERNAL AND DOMESTIC DEBT OF BOSNIA AND HERZEGOVINA

#### 3.1 External state guarantees

Bearing in mind the fact that issued state guarantees do not represent the debt of Bosnia and Herzegovina or Entities, but a potential debt to be paid in case failure by the end-user to repay the credit, the same are not included in the total public debt.

The Law on Borrowing, Debt and Guarantees of BiH (Chapter IV of the Law) defines, *inter alia*, the purpose of issuing a state guarantee, under which BiH may issue a guarantee for the purpose of financing capital investments or implementation of a priority project of significance for the economic stability of the country.

In the previous period, the matured obligations under issued external state guarantees were timely repaid by the end-users.
